LNL Raised Rail Platform Leg Kit

PLATFORM SIZE READY RECKONER

To determine which platform best suits your vehicle, follow the steps below. *Please note:* All measurements start and end 100 mm in from where top of rail runs perpendicular to bottom of rail.

Using a Tape Measure, measure the distance between rails. Given not all vehicles have a uniform width front to back, take separate measurements for both front ("F") and rear ("R"). Record the measurements in table below. The largest of these two measurements, which we will call "X", is used to determine minimum platform width.

Next measure and record below the rail length ("Y").

"F" - Between Rails (Front)	"R" - Between Rails (Rear)	"Y" - Rail Length
_____mm	_____mm	_____mm
"X" = Max of F & R		
_____mm		

The formulas opposite, using the measurements recorded above, will help determine the most suitable platform size for your vehicle. A list of Platform sizes is included overleaf.

RECOMMENDED PLATFORM SIZE	
Minimum Width	"X" + 247 mm = _____mm
Maximum* Length	"Y" + 1,100 mm = _____mm

LNL Raised Rail Platform Leg Kit

PLATFORM SIZE READY RECKONER

Platform Size	Width	Length	Part #	Order Code incl Leg Pack
A	1240 mm	1530 mm	8000337	YPURR01A
B	1380 mm	1530 mm	8000338	YPURR01B
C	1380 mm	1930 mm	8000339	YPURR01C
D	1420 mm	2130 mm	8000340	YPURR01D
E	1230 mm	2130 mm	8000341	YPURR01E
F	1570 mm	800 mm	8000342	YPURR01F
G	1570 mm	1400 mm	8000343	YPURR01G
H	1570 mm	2130 mm	8000344	YPURR01H
I	1650 mm	1400 mm	8000345	YPURR01I
J	1650 mm	1930 mm	8000346	YPURR01J
K	1240 mm	1400 mm	8000347	YPURR01K
L	1380 mm	1400 mm	8000348	YPURR01L
N	1380 mm	2130 mm	8000373	YPURR01N
P	1300 mm	1930 mm	8000375	YPURR01P
U	1485 mm	2130 mm	8000380	YPURR01U

* Maximum length is driven by having no more than 550mm unsupported overhang front or rear of the legs.

EXAMPLE - For a random vehicle, the above formulas add up to 1280mm for width 1780mm for length. This would mean Platforms B, G, I and L are all technically suitable as they are wider than 1280mm, but shorter than 1780mm. Platform B or L would be the likely choice as they are the closest match to the width of the vehicle.
